## ACCOMPLISHMENTS

### E-Training System (Full Stack Developer) 2014
A web-based electronic system that computerizes and automates most of the training-related processes in the Training and Scholarship Department at the Education Department in Al-Quwaiyah Governorate (nomination - registration - evaluation of training programs - printing certificates - printing various reports - measuring the training impact .....). The system served more than 2604 users, managing more than 492 training programs and issuing more than 4000 certificates

### School Leadership Program (Full Stack Developer) 2016
An electronic web-based program that aims to automate the operations of the School Administration Department in the Educational Supervision Department of the Education .Department in Al-Quwaiyah Governorate

## ... ACCOMPLISHMENTS

### Educational Supervisors Visits Program (Full Stack Developer) 2020
The Supervisory Plan and Technical Reports Management Program is an integrated electronic program that aims to computerize and automate all processes associated with the preparation and implementation of the supervisory plan for educational supervisors in the period of distance education "Coronavirus", in addition to automating the preparation of technical reports at the Education Office in Al-Rain Governorate.

### madrasati Platform Statistics Program (Full Stack Developer) 2021
An electronic program on the Internet with web technologies, where the system follows up the educational and school performance in the period of distance education "Coronavirus", as it processes the ministerial data files for the Madrasati platform, whose number of records exceeds 22,000 thousand records at each update, and works to measure performance and interaction, and see the percentages of change in interaction through the Madrasati platform in the Department of Education in Al-Quwaiyah Governorate **Adaa.app**

### Automated Correction Program "Kashif" OMR 2024
A program to prepare for the NAFES national exams that uses Computer Vision technology to correct thousands of answer sheets accurately and efficiently. The program not only corrects, but also analyzes student results, providing valuable insights into the percentages of change and improvement between different tests. The program also links each question to a specific target skill for students.
